

My name is Lida Constanza, but my family and friends call me Cos. I like to help people, work with children, and I love animals. I am a zoologist.

Before I came to the United States, I was working as a consultant for a poultry breeding company. In addition to my job, I was studying English and had taught subjects such as ecology and how to take care of the environment. I used to do recreational activities teaching kids morals and how to interact with others through games and group activities.

I lived with my parents, and I have a very good relationship with them. My dad is a retired police officer; as a hobby he has a small shop of silver jewelry. My mom has been a teacher for 28 years. I have a twin sister who is also my best friend; her name is Ana. She works as an accountant clerk. She is happily married to a very nice guy who is the store manager of a company that sells oxygen and welding supplies. They do not have children, but I would like to be an aunt soon. 😊

I used to spend a lot of time with my parents. I like to go to the pool, visit my family and travel. I also like to invite my friends over to my house and watch movies, eat, and talk a lot! I love dancing, listening to music, and going to the movie theater.

So far, there are many things I like about Minnesota. I like the big lakes, and I am also very excited because I was told that in winter time the lakes become ice and people can skate on them. That is something I have never done.

I would like to be contacted by email. My email address is lolita_coscora@hotmail.com
